

Shastras enjoin that a devotee of Krishna is an ocean of good qualities. However shastras also mention about the 26 qualities which are resourced into a pure Vaishnava. Srila Prabhupada when he was physically present with us, he showcased these 26 transcendental qualities and benedicted us with Krishna consciousness. It is only due to his special quality of being merciful and magnanimous, that we are today into Krishna consciousness. Let us all bow down at his lotus feet and show our gratitude to him by just fulfilling his desire of following four regulative principles, chanting 16 rounds daily, waking up for mangala arati, preaching this Krishna consciousness to others. Or else it is not possible for us to thank our beloved spiritual master in millions of lives. Haribol (Shyam of Vraj)
